The most important decision after identifying that a patient has a surgical proximal humerus fracture is patient selection, specifically with regards to what surgery will be performed. Fracture Management for Primary Care E-Book by M. Patrice ... Fracture Management for Primary Care E-Book by M. Patrice Eiff MD, Robert L. Hatch MD, MPH Fracture Management for Primary Care provides the guidance you need to evaluate and treat common fractures, as well as identify uncommon fractures that should be referred to a specialist.

Bone Fractures Management and Treatment | Cleveland Clinic How is a bone fracture treated? A bone fracture is usually treated with a cast and/or splint. A cast or splint will immobilize the bone (keep it from moving) in order to encourage the bones to align (straighten) and to prevent use of the bone. Fracture Nursing Care Management: Study Guide Fracture reduction refers to restoration of the fracture fragments to anatomic alignment and positioning and can be open or closed depending on the type of fracture. Nursing Management Nursing management for close and open fractures should be differentiated. General principles of definitive fracture management ... (See "General principles of fracture management: Bone healing and fracture description" and "General principles of acute fracture management".) CASTING Overview â€” Casting is standard treatment for many closed, nondisplaced, or reduced fractures [1].
